## Green Loans

### FAQ's

#### What are the key benefits of obtaining a Green Loan?

By obtaining a loan for the solar panels, you can spread the cost of the purchase for up to 7 years. Depending on your situation. The Green Loan interest rate is also lower than that of a Personal Loan, 6% vs 7.75%.

#### Does the bank require any collateral for the loan or is the loan secured in any way?

In most cases no collateral will be required for the loan. There may be some instances where the loan is very large (i.e. greater than \$50k) if this is the case, we would request collateral; however, this will only be in rare circumstances.

#### Do I need any special qualifications to be approved for a solar loan?

No – the loan application is assessed in the same manner as loan applications are assessed.

Standard exclusions apply – you must be in full time employment and be able to afford the loan. Full details of the documentation required to apply can be found at <https://www.hsbc.bm/loans>.

#### Is a down payment required?

No – you can borrow 100% of the cost of the Solar Panels as long as you can afford the monthly repayments.

#### What is the interest rate and terms of the loan offered by HSBC?

Green Loans are priced at 6% variable interest rate for up to 7 years

#### What is the difference between a home improvement loan for solar panels and a loan for a new kitchen?

Our standard unsecured loans are priced at a 7.75% variable interest rate and can be obtained over a maximum of 5 years. Green loans are less expensive (6% variable interest rate) and can be taken over a longer term (i.e. up to 7 years). By offering a lower interest rate and longer term for our Green Loans, it is possible for customers to match the monthly loan repayments to the savings in energy costs closely. This may not always be possible as it depends on your individual circumstance.

**Will my solar installer apply on my behalf, or this is a separate transaction I need to conduct directly with HSBC?**

You will need to apply with HSBC yourself – your solar provider cannot submit the application on your behalf; however, they should provide you with a quote for the cost of the product and installation.

**Are loans available for personal homeowners or for small businesses as well?**

This particular product is only available to individuals (not businesses). However, if your business is interested in obtaining a loan for solar panels, you should speak to your Commercial Relationship Manager and they will be able to discuss your options with you.

Please feel free to use our loan calculator found [here](#) to calculate the monthly payments for any loan amount. (For green loans the variable interest rate is 6% with a maximum term of 7 years)
